

jona.qa

where nature meets luxury?

A full-site visual review of Jona Natural Products: the homepage in depth, plus 14 more page types and the purchase flow, with a prioritised plan to make the whole store feel truly premium.

جونة للمنتجات الطبيعية — حيث تلتقي الطبيعة بالفخامة

Woodmart · Elementor

The homepage is polished. The rest of the site still shows the theme demo.

I reviewed 15 page types at desktop and mobile widths, and walked through select size → add to cart → mini-cart → cart → checkout. The homepage and product pages are well built. But **six key pages still use the Woodmart furniture-demo banner**, the English site is an empty placeholder, and 16 products have no photo. A visitor who leaves the homepage quickly meets content that doesn't belong to Jona.

PAGE	SCORE	BIGGEST ISSUE
Homepage	6	Faux-bold type and clashing photography (pages 3–8)
Checkout	7	Clean and focused. Field widths are inconsistent and there's no H1.
Blog & articles	7	Strong content. The byline reads "Admin2".
Product page	6	SKU shows "غير محدد". Off-palette "Buy now" button.
Category pages	6	Good branded banners, but placeholder images in the grid.
Mini-cart & cart	6	The delivery-info block repeats the refund text.
Contact	6	Clear details and FAQ, but no page heading or H1.
Account / login	5	Furniture-demo banner
Shop (all products)	4	Furniture-demo banner. Duplicate "herbs" category.
Search results	4	Furniture-demo banner, with the title overlapping chairs
404 page	4	Stock copy ("This is somewhat embarrassing..."). Searches posts, not products.
About us	3	Furniture-demo banner, plus a wall of text with no brand imagery
Product without photo	3	Grey placeholder on a 235 QAR honey. 16 products are affected.
English homepage	1	An empty "Home – English" page with a public "create menu" prompt

5/10

Site-wide score. Fixing the three critical items (pages 9–13) would lift it to about 7 within a week.

A strong foundation, held back by small inconsistencies

The palette is a deep forest green and warm cream that suits a premium natural-products brand. Packaging photography is consistent, and the homepage tells a clear story: discover, browse, learn, reassure. Right-to-left layout is handled properly throughout.

What keeps the site from feeling truly luxurious is a set of small, fixable details: synthesized bold headings, two clashing photography styles, orphaned grid tiles, uneven product cards, a clip-art avatar and leftover theme-demo content. **Most fixes are low effort.**

Homepage scorecard

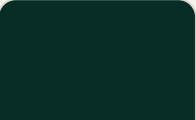

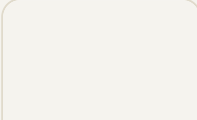

Brand & colour		8
Strong, coherent green/cream. One off-palette dusty-rose pill.		
Typography		5
One font file, faux-bold headings, 17 font sizes.		
Imagery & photography		6
Beautiful lifestyle scenes clash with cool grey studio packshots. Some images are reused.		
Layout, grid & spacing		6
Clean sections and generous whitespace, but orphan tiles and uneven cards.		
Mobile experience		6
Usable, but hero CTAs wrap and cards are dominated by heavy buttons.		
Accessibility (visual)		5
Low-contrast meta text, pinch-zoom disabled, missing alt text.		
Polish & consistency		5
Demo leftovers, clip-art avatar, mixed text alignment.		
Performance (perceived)		5
About 191 requests (81 CSS, 66 JS) and about 4.6 MB on desktop.		

6/10

Homepage score. A good foundation that needs one focused polish pass. Most of these fixes take under a day each.

A restrained, on-brand palette with one stray accent

Colours below were extracted from the live page's computed styles, ranked by how often they appear.

 Forest #082C26 · primary	 Pine #174833 · secondary	 Olive #596854 · body accent	 Cream #F5F3EE · surface	 Dusty rose #A4847C OFF-PALETTE	 Grey meta #A5A5A5 2.46:1
--	--	---	--	---	---

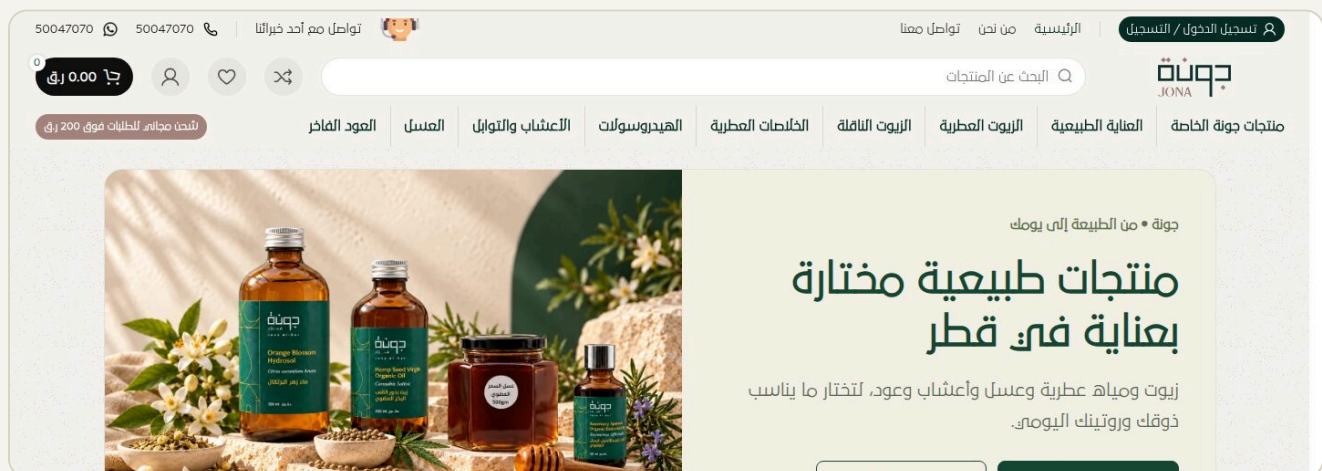

WHAT WORKS

- Forest green on cream has a **13.5:1** contrast ratio. It is elegant and very readable.
- Alternating cream and white section backgrounds create a calm, editorial rhythm.
- Green is used consistently for text, primary buttons, badges and the footer.

ISSUES

- The **free-shipping pill** uses dusty rose, which appears nowhere else. White 11px text on it has only 3.4:1 contrast, which fails WCAG AA.
→ Use forest green, or adopt a muted gold as an official accent.
- The **sale red** #E01020 is harsh against the earthy tones, and the -8% badge already uses green.
→ Pick one discount colour.
- The **footer logo** sits in a pale box on dark green and looks pasted on.
→ Use a cream knockout logo.

Header details

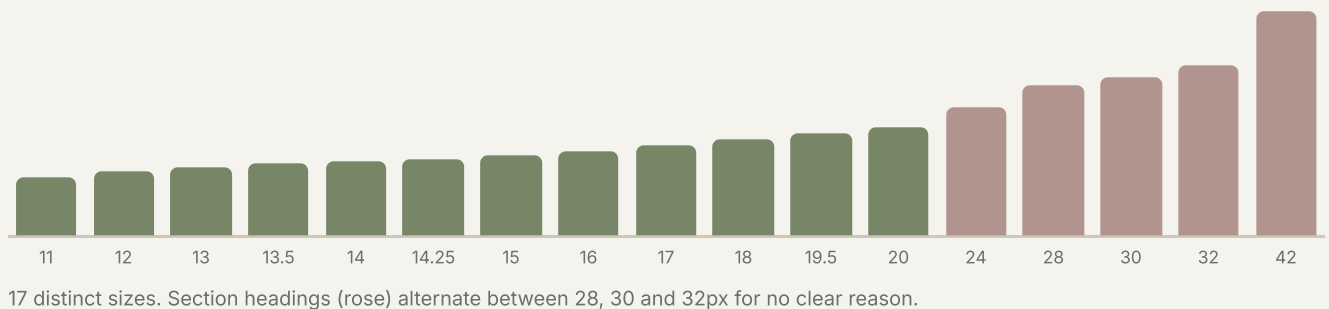

Busy three-row header with the off-palette rose pill (top left) and the clip-art call-centre avatar (top right).

A distinctive typeface, rendered with fake bold

29LT Bukra is a modern Arabic typeface that suits the brand. But only `29LT-Bukra-Regular.woff` is loaded, and every heading asks for weight 700. The browser therefore **synthesizes the bold**, which looks smudgy and uneven on Arabic letterforms, most noticeably in the 42px hero headline.

Font sizes in use (desktop)

ISSUES

- **Faux bold** on every heading, because only the Regular weight is loaded.
- **Fragmented scale:** 17 sizes, with section H2s set at 32, 30 and 28px.
- **Inverted hierarchy:** the hero feature H3s are 14px, smaller than the 17px product-name H3s.
- **Mixed alignment:** guide cards are centre-aligned while every other section is right-aligned.
- The font is legacy WOFF (37 KB) with no preload.

RECOMMENDED

- Self-host **Bukra Bold** (plus Light or Medium) as **WOFF2**, and preload the primary weight.
- Adopt one scale: `12 · 14 · 16 · 20 · 24 · 32 · 44`.
- Make every section H2 the same size (32px).
- Right-align guide cards to match the rest of the RTL layout.

Affected hero headline (shown here in a substitute font): **منتجات طبيعية مختارة بعناية في قطر**

Two photographic worlds on one page

Warm, sunlit category scenes (top) sit directly above cool, grey-gradient studio packshots (bottom). Note the uneven product image heights and the empty slot in the category grid.

WHAT WORKS

- The hero and category photography is warm and aspirational: stone, botanicals, honey dippers.
- Jona's packaging is consistent (green labels, kraft pouches) and builds recognition.

ISSUES

- The **colour temperature jumps** from warm lifestyle shots to cool grey packshots.
→ Re-grade or re-shoot packshots on warm cream (#F5F3EE).
- **Uneven framing:** product images vary in height, and some leave a white strip.
→ Enforce 1:1 or 4:5 frames with the product filling about 70%.
- The **orange-blossom scene is used three times** (hero, feature card, blog).
- The **clip-art avatar** in the top bar feels off-brand.
→ Replace it with a line icon or a real team photo.

Clean sections, but the grid and mobile need care

Mobile hero: both CTAs wrap onto two lines, and the "0" badge overlaps the cart icon.

A lone 9th category tile, followed by heavy dark "Select options" buttons on every card.

LAYOUT

- **Orphan tile:** 9 categories in 5-column (desktop) and 2-column (mobile) grids.
→ Use a 3×3 grid, or add an "All products" tile.
- The "Discover more" cards are unbalanced: one has an image and one is text only.
- The **three-row header** with a 10-item navigation feels busy.
- Section links are inconsistent: some have an arrow (→) and some don't.

MOBILE

- **Hero CTAs wrap.**
→ Stack them full width, or shorten them to "تسوق الآن".
- **8 identical dark buttons** outweigh the products.
→ Use an outline or "+" icon button, or make the whole card tappable.
- Hide the cart badge when it shows 0.
- 35 tap targets are smaller than 32px.

The details that signal quality

CHECK	RESULT	RECOMMENDATION
Body text, green on white/cream	✓ 13.5–15:1	Keep
Grey category text #A5A5A5	✗ 2.46:1	Use olive #596854 (5.9:1)
White on dusty-rose pill, 11px	✗ 3.4:1	Green background, 12px or larger
Pinch-zoom	✗ Disabled	Remove user-scalable=no
Image alt text	! 23 of 30 missing	Add alt text to the logo and category images
Icon-only links without a label	! 7	Add aria-label
Meta description and Open Graph tags	✗ None	Add og:image for WhatsApp/Instagram sharing
Theme-demo leftovers	! Present	Rename /en/home-furniture2-english/ and give the EN page an English title

Page weight (desktop, sandbox measurement)

requests

81

stylesheets

4.6 MB

transferred

~6.6 s

load event

- Combine and defer CSS/JS (LiteSpeed Cache on Hostinger), and disable unused Woodmart and Elementor modules.
- **Oversized images:** the logo is a 1439px PNG shown at 197px, and blog images are 1024px shown at 336px.
 - Use SVG for the logo, and correctly sized WebP/AVIF for photos.

These timings come from a sandboxed cloud browser and are indicative only. Confirm them with PageSpeed Insights.

Furniture-store banners on a natural-products shop

The default page-title background still uses the Woodmart *"Furniture 2"* demo image: chairs and a sofa. It appears on **Shop, About us, Search results, Cart (empty and checkout steps), My account** and the **English homepage**. These are some of the most-visited pages after the homepage, and on most of them the page title is drawn straight over the chairs.

Shop · About · Search · Cart steps · My account · English homepage, all captured from the live site on 2 Oct 2026.

WHY IT MATTERS

- It instantly breaks the "nature meets luxury" story and signals an unfinished template.
- Titles such as نتائج البحث and حسابي collide with the chairs, which hurts legibility.
- On mobile, the banner is squeezed into a thin strip that still shows furniture.

EVIDENCE

- The image file is `wd-furniture-pt-def.jpg`, uploaded in 2023 by the Woodmart demo import.
- It's set as the theme's **default** page title, so every page without its own banner falls back to it.
- Category pages already override it with Jona photography, so the fix is proven on the site.

What should replace it? Not plain cream.

I restyled the live Shop page in the browser to compare the options. The header, navigation and title are the real site, and only the banner changes.

TODAY Furniture demo image

AVOID Plain cream #F5F3EE

BEST Jona photography (the existing honey banner, reused)

GOOD Forest-green band #082C26, cream title

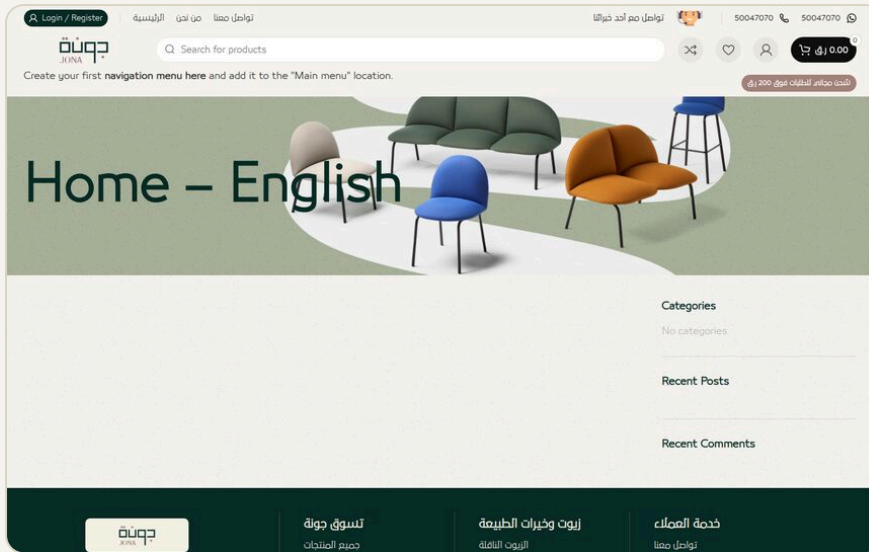

WHY NOT PLAIN CREAM

- The header and page are already cream, so the band **merges into both**. The title floats with no top edge, and the page looks unfinished.
- It wastes the brand moment on some of the most-visited pages.

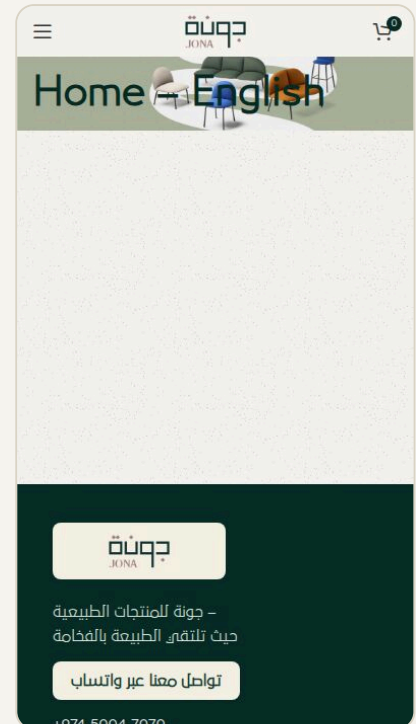

RECOMMENDATION

- **Shop and About:** photo banners in the style of the category pages (warm stone, botanicals, title on the right). About 1–2 days including photography.
- **Search, Cart, Account and 404:** the forest-green band. It echoes the footer, cream on green has 13.5:1 contrast, and it takes about 30 minutes in Theme Settings → Page title.
- Do the green band first as the site-wide default, so no page can fall back to furniture again.

The English site is an empty demo page

/en/home-furniture2-english/ on desktop

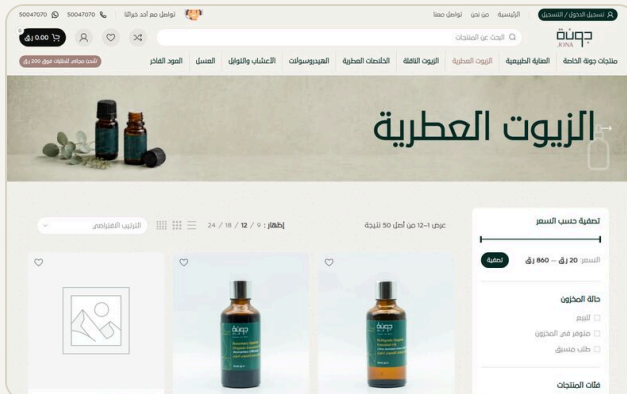

Mobile

WHAT AN ENGLISH-SPEAKING VISITOR SEES

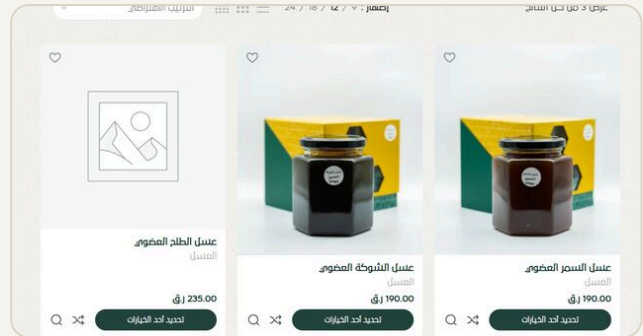

- The page heading reads **"Home – English"** over the furniture banner. The body is empty except for blank WordPress widgets ("Categories: No categories", "Recent Posts", "Recent Comments").
- An admin prompt is shown publicly: **"Create your first navigation menu here"**. It links to `/wp-admin/nav-menus.php`.
- The header is English, but the menu links, footer and copyright are Arabic. The page's `<title>` is Arabic too.
- The mobile tab bar reads **"Shop · Sidebar · Wishlist · Cart · My acc..."**. "Sidebar" is a demo label and "My account" is truncated.
- The URL slug `home-furniture2-english` exposes the demo origin, and no product or category has an English version.

Recommendation: until the English catalogue is translated, **hide the language switcher and unpublish /en/**. A missing English site is better than a broken one. When it's ready, build it from the Arabic homepage template, assign an English menu and use the slug `/en/`.

A tidy grid, let down by catalogue gaps

Essential oils: a well-branded banner, but the first product is a placeholder.

Honey has only 3 products, and the most expensive (235 QAR) has no photo.

Shop grid and filter sidebar

WHAT WORKS

- **Category banners are excellent:** on-brand stone and botanical scenes with large green titles. Use this pattern everywhere.
- Rounded white cards, clear prices, and a filter sidebar with counts.
- The sidebar promo card ("Orange blossom water, 10% off the large bottle") is a nice touch.

ISSUES

- **Duplicate category:** "الأعشاب والبهارات" (1 product) next to "الأعشاب والتوابل" (43). Merge them.
- **Button colour drifts:** "Select options" is grey-green on Shop and Category pages, but dark forest green on the homepage.
- The price-filter slider shows no visible handles, so it reads as a plain line.
- Cards with placeholders are shorter than their neighbours, which breaks the row rhythm.

A solid product page, but the catalogue has gaps

Hemp seed oil: gallery on the right, clear price, size pills, quantity, add to cart and "Buy now"

WHAT WORKS

- Clean two-column layout, a large product image and a thumbnail rail.
- Size is shown as pill swatches rather than a dropdown, which is clear and tappable.
- Well-written descriptions, with a benefits checklist.
- The mini-cart drawer has a **free-shipping progress bar** ("add 145 QAR more..."). Good.

ISSUES

- **SKU: "غير محدد"** (Not specified) is shown on every product. Hide the SKU row or fill it in.
- "Buy now" uses the off-palette dusty rose. Make it an outline button in green.
- The cart shows the size as its URL slug (with a hyphen) instead of the label "100 مل".
- The "Reviews (0)" tab shows on every product (0 reviews site-wide). Hide it until reviews exist.
- No meta description or OG image, so shared links have no preview.

Catalogue health (from the store's public product API, 165 products)

16

products with no photo

66

products with only one photo

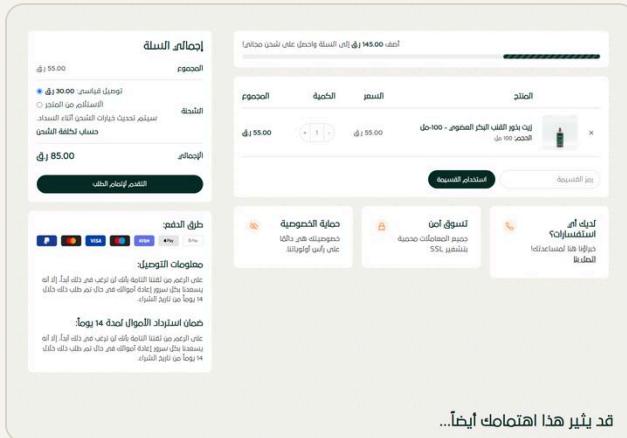

4

Jona-branded products with no category

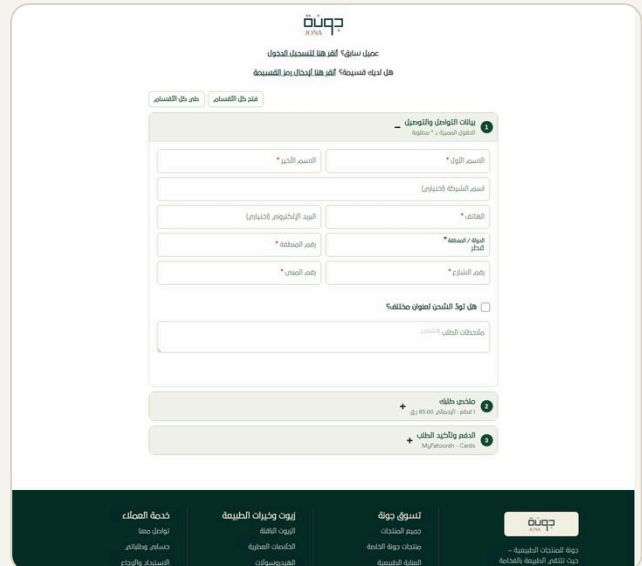

0

customer reviews

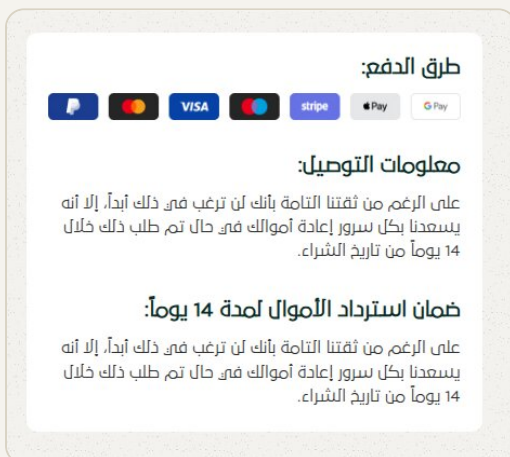

Checkout is the best-designed part of the site

Cart: progress bar, totals, trust badges

Checkout: no navigation, three numbered accordion steps

"Delivery information" repeats the refund paragraph word for word.

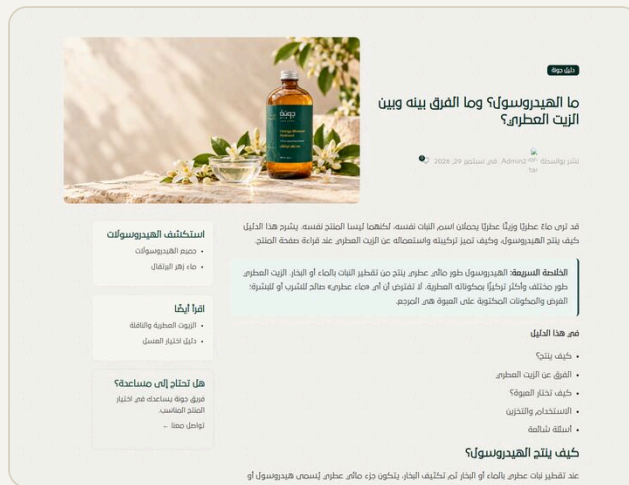

ISSUES

- **Copy bug:** the delivery block says nothing about delivery. Write real delivery times and areas.
- **Payment logos** show PayPal, Stripe and Maestro, which look like theme defaults. Checkout offers MyFatoorah. Show only the methods you accept.
- **Checkout fields** have uneven widths on mobile (the company field is wider than the rest).
- "Expand all / Collapse all" buttons add clutter, and the order summary is collapsed by default.
- The full footer shows on checkout. Trim it to reduce distraction.
- Cart, checkout and contact have no H1.

WHAT WORKS

- Distraction-free checkout with only the logo, numbered steps and a pre-filled country (Qatar).
- Cart trust cards (secure shopping, privacy, need help?) in brand colours. Shipping options are clear: standard 30 QAR or in-store pickup.

Great guides, a forgettable About page

Article: "What is a hydrosol?"

About us: lines run about 1,400px wide in small text

BLOG & ARTICLES · 7/10

- Excellent structure: a quick-summary callout, a table of contents, H2/H3 sections and an FAQ.
- A helpful sidebar ("Explore hydrosols", "Need help?").
- **But:** the byline reads "Admin2". Use "فريق جونا" (Jona team) or a real author.
- **Missed opportunity:** no product cards inside articles. Embed the products being discussed.

ABOUT · CONTACT · 404

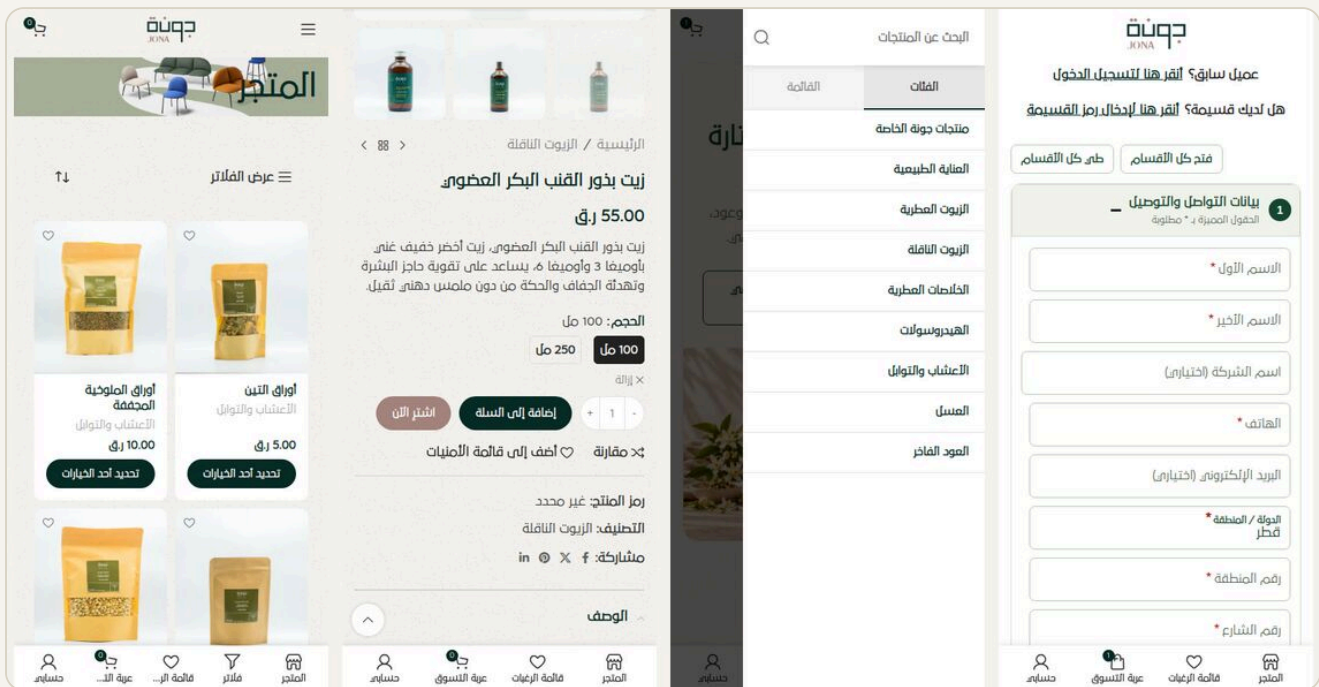

- **About:** furniture banner, then a full-width wall of text with no photos of the team, sourcing or products.
→ Limit line width to 70ch, and add imagery and the 9 collections as visual tiles.
- **Contact:** clear info row and a good FAQ, but no page banner (inconsistent with other pages) and no H1.
- **404:** theme stock copy

هذا محرج نوعاً ما، أليس كذلك؟

The search box also looks only in blog posts.

→ Write a warm, on-brand message, use a product search and show bestsellers.

Mobile shopping works well. Fix the banners.

Shop · Product with a size selected · Mobile menu · Checkout (390px)

WHAT WORKS

- A swipeable product gallery, large size pills, and add-to-cart and buy-now buttons side by side.
- The mobile menu has search, category and menu tabs, and a clean list.
- A persistent bottom tab bar (Store, Wishlist, Cart, Account), plus Filters on the Shop page.
- No horizontal overflow on any of the 15 pages tested.

ISSUES

- The furniture banner is squeezed into a thin strip, with page titles overlapping the chairs.
- The cart badge "0" overlaps the cart icon in the header on every page.
- Every product card has a heavy "تحديد أحد الخيارات" (Select options) button. Use a lighter "+" icon.
- The cart's info cards sit in a carousel whose arrows overlap the card edges.
- English mobile tab bar: "Sidebar" and a truncated "My acc..."

Sixteen fixes, ranked by impact

#	FIX	WHERE	IMPACT	EFFORT
01	Replace the furniture-demo page-title banner : forest-green default now, Jona photo banners on Shop and About	6 pages	Critical	Low
02	Unpublish or rebuild the English site and remove the public "create menu" prompt	/en/	Critical	Low
03	Photograph the 16 products with no photo , or hide them until they have one	Catalogue	High	Med
04	Load the real Bukra Bold in WOFF2 to end faux-bold headings	Site-wide	High	Low
05	Put packshots on a warm cream backdrop and use one aspect ratio	Catalogue	High	Med
06	Fix the cart copy bug and show only the payment logos you actually accept	Cart	High	Low
07	Hide "SKU: Not specified" and the "Reviews (0)" tab. Fix the size label in the cart.	Product	Med	Low
08	Merge the duplicate herbs category and assign categories to the 4 Jona products	Shop	Med	Low
09	Unify button colours . Make "Buy now" and the promo pill green or gold.	Site-wide	Med	Low
10	Redesign About us with imagery and a 70ch line length	About	Med	Med
11	Write an on-brand 404 with product search and bestsellers. Change the "Admin2" byline.	404 · Blog	Med	Low
12	Homepage: fix the category orphan, darken the grey text, replace the clip-art avatar	Home	Med	Low
13	Mobile: stack the hero CTAs, use lighter card buttons, hide the "0" badge	Mobile	Med	Low
14	Add a meta description and OG image to every page. Add H1s to contact, cart and checkout.	Site-wide	Med	Low
15	Re-enable pinch-zoom , add alt text, and consolidate the type scale	Site-wide	Med	Low
16	Combine and defer CSS/JS. Resize the logo (1439px shown at 197px) and other images.	Site-wide	Med	Med

Methodology & caveats

15 page types were rendered in headless Chromium at 1440px and 390px: home, shop, two categories, two products, English home, blog, article, about, contact, search, 404, account, and cart/checkout. The purchase flow was walked through as far as the checkout form. **No order was placed**. Catalogue figures come from the store's public WooCommerce product API.

The audit environment blocked a few third-party resources: chat widget, Google Map, Hostinger embed and payment icons. These are not counted as defects. Interactive mega-menu hover states were not captured.
